

# 360°環物攝影多角度互動

## 360 DEGREE PRODUCT PRESENT

### Important Features for Photographing Fashion Apparel & Accessories

- One Program Control Everything: Lighting, camera settings, turntable movement, image capture, editing and batch saving
- Computer-controlled: maintain image consistency and simplifies/accelerates product photography
- Take Web-ready product shots on pure white and transparent backgrounds
- Capture 360 and 3D product views and display them on any device
- Create informational and 360 product videos
- Memorize and re-use best light, camera and workflow settings
- Custom Defined Workflow and Multiple Camera Control to repeatedly capture the same angles
- When taken a picture with several items, will automatically identify each item in the photograph and save them individually
- Extensive Training – Professional product photography

# 360 Photography

- All-in-one 360 product photography systems and turntables for creating 360 product view in-house, fast and efficiently.
- Fast to create 360 product views for E-Commerce and other applications.
- Our most popular 360 photography equipment feature a patented transparent turntable with surround LED lighting for taking 360 photos on pure white and transparent backgrounds.
- TTF offers a wide range of still shot product photography solutions capable of shooting images in the following formats: JPG/Raw/TIFF/PNG. Each offers color-accurate and shadow free photography results. Most can automatically take product shots on a pure white background or transparent background with little to no editing.
